Lower Withlacoochee River Project Status

- Low-tide springs surveys in Barge Canal and lower river completed in February and March
- Lake Rousseau bathymetric survey complete
- FWC completed summer fish survey in June
 - Collected 32 freshwater, estuarine, and marine species
 - Spotted Bullhead collected for 1st time
 - 2nd survey planned for winter
- Water quality analysis almost complete
- Bathymetric survey of lower river will start soon
